ESG Equity Investment Strategy

The Sustainable Investment Goal of the funds is the capture of returns through investments in companies with a high level of sustainability and corporate governance, by creating a theoretical investment portfolio based on all assets listed on B3, selecting issuers with an ESG rating equal to or higher than the sector ESG rating (Best in Class) and according to the quality quartile selection criteria defined by Bradesco Asset. In addition, the portfolio may hold assets showing clear ESG commitments, provided that they do not contribute to potential harm to the fund and that the manager and the company undertake to establish engagement commitments.
